

We offer comprehensive extrusion molding services, tooling design assistance, secondary operations and an ISO 9001 Certified quality system to meet your business needs. Our dedicated and experienced staff ensures you get personalized technical assistance, fast order turnaround and expedited customer care.

Why choose Geist Plastics?

- # Highly capable and committed staff to ensure you get fast personal service
 - Real people to talk to -
- # Tool and die sourcing through our first class partners
- # Experienced engineering assistance through our corporate resources
- # Short lead times
- # ISO 9001 Quality System certification
- # Just-in-time delivery to meet your requirements
- # Low minimum order and no drop-ship restrictions
- # Central Midwest location for shipping around the country
 - Save money and time

Plant and Process Capabilities

Modern 25, 000 square foot facility optimized for manufacturability and secondary operations

- 2.5" and 3.5" Extruders
- 0.5" to 7" flat or round extrusions
- Tolerance guidelines:
 - Minimum wall thickness: +/- .025"
 - Wall thickness variance: +/- 8-10%
 - Angles: +/- 2-5%
 - Width or height: +/- .010" per inch of width
 - Cut length +/- .062" to .125"
 - Straightness +/- .045" bow per foot of length

Plastic Extrusion Materials

We have the ability to run any resin to meet your specifications and currently inventory:

- Polyethylene (s)
- Ridged PVC
- Flexible PVC
- Polypropylene

Secondary Operations

- Sawing
- Cutting
- Beveling
- Gluing
- Tape application
- Slotting
- Bending, Shaping
- Threading, internal and external
- Inserts
- Drilling
- Punching
- In-line printing and marking
- Labeling
- Slitting
- Assembly
- Custom applications
